Water Restriction Ends Ahead of Schedule

Lloydminster, AB/SK – The City of Lloydminster thanks residents and businesses for their cooperation in conserving water during the system maintenance project. The project is complete and the restriction has been lifted.

The City of Lloydminster did not have access to water from the North Saskatchewan River while important maintenance work was completed. To ensure the community's most vital water needs were sustained through the shutdown, the City of Lloydminster called on all residents and businesses to minimize demand on the municipal water system.

"We called on our residents and businesses to lend a hand and reduce demand and they answered, resulting in a significant reduction in usage" said Alan Cayford, Director, Operations. "We are pleased to announce the project has been completed one day earlier than planned."

The City thanks residents for reporting all non-essential water use, including the accidental use of the irrigation system at the RCMP Building.
